How to Clear Your Browser's Cache

For Internet Explorer 9, 10, and 11

1. Once your browser is open, click the gear icon at the top right to open the Settings menu. Then, select Safety and Delete Browsing History.
2. Select **Temporary Internet files** and website files. You will also need to uncheck all of the other boxes, especially **Preserve Favorites website data.** This option makes the window also delete objects from websites in your Favorites folder, which is necessary to completely clear your cache.
3. Click the Delete button near the bottom of the window to perform the operations (i.e. clear your cache by deleting temporary files).
4. Your computer will work for a moment, and then the process will be complete. You've successfully cleared the Internet Explorer 9's Cache.

For Chrome v10+

1. Open the settings on Chrome. Click the menu icon in the upper right corner of the browser to the right. Click settings on the bottom of the menu.
2. From settings, click "Show advanced settings…". It's located at the very bottom of the settings section.
3. Scroll to the privacy section and click "Clear browsing data".
4. Select "Cached images and files." Uncheck all other options to avoid deleting browser history, cookies and other things you may wish to retain. Change "Obliterate the following items" to "the beginning of time".
5. Press "Clear browsing data". You are done!

For Firefox 30+

1. Go to the most right button on the toolbar.
2. Click the "Options" button (that one with a gear). The options dialog appears
3. Select the Advanced button and then the "Network" tab.
4. After that push the "Clear Now" button inside the "Cached Web Content" section.
5. You've successfully cleared Firefox's Cache!
